

Greetings! We are a premier Data and Business Management and Service company. We continue to develop innovative ways and services to help our clients increase business productivity and profitability, save valuable time, make the most out of their resources and workforce and boost their outcome.

One of the solutions we offer is the **Zerix Wireless**. Our expertise in the area of Local and Wide Area Networks allows us to provide our clients with the required connectivity solutions that are efficient and cost-effective. We make sure that the network and connections are properly designed and implemented so as to provide optimum speed and performance. As such, we are able to design and implement secure and reliable wireless networks to entities of various sizes.

Our Wireless Solutions are based on WiFi technology. We will be proving the Zerix access points, routers and client bridges that can distribute very strong signal compared to your usual wireless equipments. All you need to prepare is your Internet connection, and then we'll do the rest of the job to make your place WiFi ready.

Zerix Wireless is the cheapest solution for you to make your business area WiFi ready. This is a one-time investment that can give you unlimited earnings. No profit sharing. 100% of your earnings from your WiFi services will be yours.

These are only the basics. We guarantee that we will deliver the wireless communication system that suits your requirements.

We're looking forward on discussing to your IT team your wireless need depending on your network infrastructure.

Thank you very much.

Truly yours,

ABIGAEL D. LESAGE
